- Great Engine Time Remaining!
- Air Ambulance Equipped with Dual Life Port Stretchers!
- New Interior In Progress!

HISTORY

The Beechcraft Super King Air family is part of a line of twin-turboprop aircraft produced by Beechcraft.

The Model 200 and Model 300 series were originally marketed as the "Super King Air" family; the "Super" designation was dropped in 1996. They form the King Air line together with the King Air Model 90 and 100 series.

The Super King Air family has been in continuous production since 1974, the longest production run of any civilian turboprop aircraft in its class. It outlasted all of its previous competitors.
